Press conference OTC: 20 suggestions for improved Ex-inspections

>>mailtekst<<

Dear ...

On May 4th at OTC, we invite you to a press conference at 10.00 to 10.50 a.m. At the press conference, SafeEx will release a white paper with "20 suggestions for improved Ex-inspections" which is completed in collaboration between Atec, Jonas Engineering, Karsten Moholt, Semco Maritime, Proconics and SafeEx.

The reason for the recommendations is the explosions within the recent years caused by lack of maintenance. Therefore, the companies behind the press conference have collected their experiences and ideas, on how Ex-inspections can be improved, in the white paper.

The recommendations will especially focus on how modern electronic inspection systems will be able to increase safety and efficiency.

The press conference takes place in room 406-407, level 2 in NRG Center. Prior registration to the conference is not necessary. A press kit will be handed out to all journalists present.

On behalf of SafeEx

White paper: 20 suggestions for improved Ex-inspections

>>mailtekst<<

Dear ...

Enclosed is a white paper on "20 suggestions for improved Ex-inspections" which is completed in collaboration between Atec, Jonas Engineering, Karsten Moholt, Semco Maritime, Proconics and SafeEx.

The white paper aims to inspire how Ex-inspections can be improved. The reason for the recommendations is the explosions within the recent years caused by lack of maintenance.

The recommendations especially focus on how modern electronic inspection systems will be able to increase safety and efficiency.

I hope that you will find the recommendations relevant to your readers. Please, let us know if you choose to publish the white paper.
